Mac OS X Dictionary Cleaner from Two AM Software

New utility edits your custom spelling dictionary

Salt Lake City, Utah (August 7, 2008) - Two AM Software has released Dictionary Cleaner, an innovative utility that for the first time gives Macintosh users the power to view and edit their custom spelling dictionaries. The intuitive, clean interface makes it easy for any user to master without a manual. Dictionary Cleaner will even create a custom dictionary in any of ten languages.

Do you want to know if you have misspelled words in your spell checker? Did you accidentally add a wrong word to your dictionary? Do you wonder what words are actually in your custom dictionary? Dictionary Cleaner answers those questions and more.

Rich Catalano, the founder of [Two AM Software](#), says, "One of the great features of Mac OS X is the built-in spelling checker and dictionary. Unfortunately, there has been no easy way to see what words you've added, to add words to the dictionary while not in a word processor or editor, or to remove spellings you've accidentally added. Dictionary Cleaner gives you the power to do all that and more."

Dictionary Cleaner installs with just one click. It resides in the Mac's System Preferences panel making it always just two clicks away. The utility is packed with several powerful features that gives users more control over their computer.

- * The simple easy-to-use interface allows users to view, add and delete words.
- * It is compactly written to take advantage of Mac OS X 10.5 Leopard and Objective-C 2.0's programming language strengths.
- * Fool-proof one-click install process. Users can even delete it with one click!
- * The easy-to-find System Preferences pane is just two clicks away from anywhere.
- * Unlike an application, Dictionary Cleaner doesn't waste a spot in your Applications folder.
- * Support for English, French, German, Spanish, Japanese, Chinese (Simplified and Traditional), Portuguese, Polish, and Finnish.
- * Don't have a custom dictionary yet? Dictionary Cleaner will create one for you, in your preferred language.

The free first release, downloaded over 500 times online in the first 10 hours on one web site, has been favorably reviewed with one user saying, "This is absolutely fantastic -

thanks a million! Great interface too.” Another user wrote, “Holy crap, I had a LOT of words added since Oct '07! This is a gem!”

Dictionary Cleaner is available at TwoAMSoftware.com, Apple Computer, Macupdate.com, and Download.com. Catalano is working on Dictionary Cleaner improvements; so contact him at rich@twoamsoftware.com if you have a feature request. Future releases will be shareware.
